

DEERY SUPER STRETCH

DESCRIPTION: DEERY Super Stretch is a fast curing, premium quality, hot applied single component crack & joint sealant. Our best all-around sealant. Only the most appropriate high quality synthetic elastomers, polymers, and anti-oxidants meeting exacting standards are used in combination with select asphalt plasticizers and naturally occurring reinforcing materials. The sealant contains no solvent, is highly waterproof and resistant to a wide range of salts, bases, and organic materials. Super Stretch is tested for low temperature flexibility at -20°F (-29°C).

USE: DEERY Super Stretch is an excellent sealant for road, airport and parking area applications for sealing longitudinal and traverse joints and random cracks in Asphalt or Concrete pavements where a fast curing sealant is desirable. The material's superior combination of fast melting, low viscosity and above average high and low temperature properties result in a sealant preferred by many experienced applicators and end users alike.
